A.I Tools Report

Instructions: Utilize websites like Futuretools.io or There's An AI For That to evaluate various A.I tools. You can also use other resources as well.

Passing Score: 25 points

Scoring:

- 5 Points Per Tool
- 25 Points Per Demonstration
    - Bonus Points
        - 75 additional points per combination (2 tools = 200 points, 3 tools = 300 points). Combinations don't have to be limited to A.I tools.
        - Examples:
            - Combine the AI image generation tool Midjourney with Google Slides.
            - Combine data generated from ChatGPT with Google Sheet's charts tool
        - 4X additional points per collaboration (If you had 200 points and you do a collaboration with another student, you now have 800 points)
- You cannot do just a summary for a tool that has already been covered, but you can do a summary plus a demo. You can see the list of tools covered here.

REPORT FORMAT ON NEXT PAGE

A.I Tools Report

Student Name: Onyemobi Anyiwo

Date: June 12, 2023

Name: ChatGPT

URL: https://www.openai.com/chatgpt

Latest Version: GPT4 (Released March 14, 2023)

Summary: OpenAI ChatGPT is an advanced language model based on the GPT-3 architecture, designed for generating human-like text responses in various applications.

Features and functionality: ChatGPT can generate text as well as code

Pricing: OpenAI provides free trials, pay-as-you-go, and custom pricing plans based on API usage.

Applications: ChatGPT is widely used in customer support chatbots, content generation, virtual assistants, and education.

- ☐ Demonstration (Post link if there is one)
- ☐ Combination (Name the other tools): _____
- ☐ Collaboration (Name the other people): _____
